P.38-39 Little Writer

My name is Alan. I interviewed 100 students about what activities they do after school. The result shows that, 26 students read books, 35 students do sports, 18 students play music instruments, and other students do other activities.

There are many kinds of books, for example, comics, non-fictions and fictions. 14 students like to read comics, 14 students like to read non-fictions and 8 students like to read fictions.

Students learn different music instruments too. For example, piano, violin and flute. 9 students learn about playing the piano, 6 students learn to play violin and 3 students learn about playing flute.

I believe doing different activities after school is good for students.
